

Tech Tools or Toys?

understanding the problem to apply the right solutions

Simi Gandhi-Whitaker

Strategic Workplace and Tech Dir

The evolution of how we use the tech available...

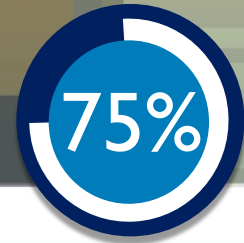

3 questions you need to ask yourself

I. What problem are you trying to solve?

of Global CO2 emissions come from buildings

Improve the colleague experience

of world's population work in buildings

Create data-led solutions so it is completely frictionless

opportunity as FM sector to optimise workplaces to improve user experience using technology

Improve the decarbonisation of buildings

2. Have you got the right tech and data to optimise these workspaces?

3. Is this tech still a tool or has it become an outdated toy?

Do you want to be yesterday's **Nintendo Switch** when you can be tomorrow's **ChatGPT**?

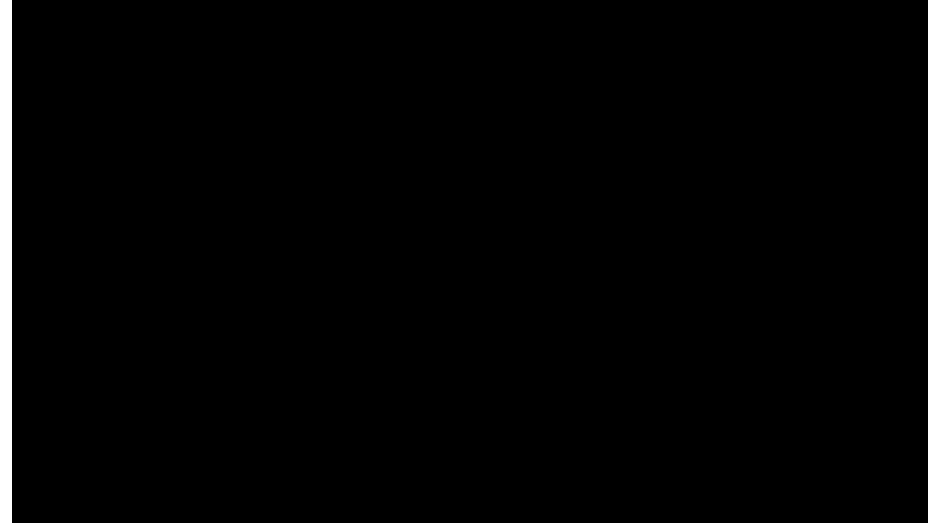

Final thoughts...
